### DIY It explains to install

**1** Shut off the water supply.

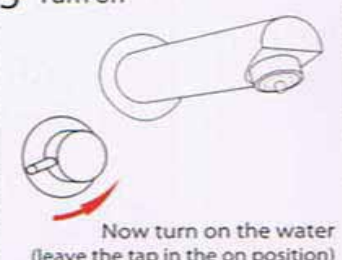

Remove existing aerator and set off screw using a wrench.

**2** Tighten

Attach "One Touch" tap's nozzle, fasten it up using a wrench.

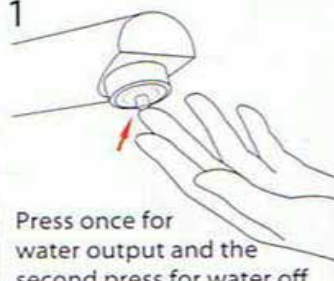

**3** Turn on

Now turn on the water (leave the tap in the on position)

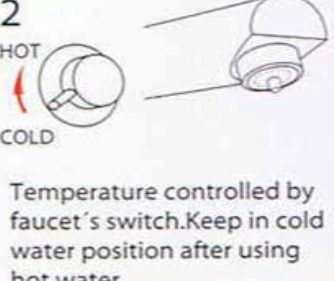

### Operation instructions

**1**

Press once for water output and the second press for water off

**2**

HOT  
COLD

Temperature controlled by faucet's switch. Keep in cold water position after using hot water.

**Precautions**

- ◆ Turn off faucet if water non-supplied
- ◆ Turn off hot water and turn back to cold water after using hot water to avoid hot water's flowing back to effect water boiler's function
